

Oriental

Oriental

Introduction

Branford Lockworks catalog lists this popular Eastlake pattern in 1884. Recurring design components include an open fan, the rising sun and bamboo. Noteworthy is the detailing on the reverse sides of the doorknobs and hinge reveals.

All interior and exterior locks have decorative fronts and strike plates. Hinges are made the traditional way with loose pins and opposing finials that are threaded. Each piece is cast in bronze and finished by hand using the same techniques of over 125 years ago. The bronze has a living finish that will acquire a statuary patina with time. Hand antiquing is offered to make the hardware look old at the time of installation. This series is compatible with tubular latches and traditional mortise locks.
