

Locks & Latches

Locks & Latches

Introduction

Our **door latches** are made for antique and reproduction doorknobs that use spindles to connect the doorknobs. They are compatible with new pre-bored doors. They fit standard edge and face borings all the same. The standard backset is 2 3/8". Tubular **passage latches** are for hall doors, etc. and tubular **privacy latches** are used for doors that need to lock. A small pin passes through the plate or rosette beside the doorknob and is pushed to lock the doorknobs. From the hall side, there is a small access hole to push the pin back to the unlocked position for emergency access. These reversible latches are heavy duty to last a lifetime and are available in matching finishes. See schematic diagram on page **14A-2**.

Privacy bolts are tubular and are used for a traditional way to lock a door. May be mounted above an antique set or below doorknob rosettes. May also be used in lieu of a deadbolt on exterior doors where keyed access is not needed.

Our **interior mortise locks** are reproductions of antique locks. All of the internal moving parts are solid brass. **Keyed mortise locks** are locked by a skeleton key on either side. **Privacy mortise** locks had a turn on the inside. The key hole on the hall side is for emergency access. Strike plates are included. These reversible locks are available in matching finishes. See schematic diagram on page **14A-5**.

Our **exterior mortise lock** sets are made for Baldwin mortise locks. This is the best lock we found. Locks with buttons on the front allow the doorknob to be locked so that the door may be locked without a key. Locks without buttons are locked only by key. All locks use modern keyed cylinder for the exterior and privacy turn on the inside. Double cylinder lock sets are available on request. These locks are available in matching finishes. CHCO is the only company with matching decorative front locks in the Oriental and Rice patterns. Backsets, handing and cylinder lengths are available to function with your door.
